**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Flick (US 6512465).

Regarding Claim 1, Flick discloses a vehicle tracker including stationary time determination and associated methods wherein claimed state detecting arrangement is met by vehicle sensor, such as motion sensor, see Col. 19 lns 4-7; claimed state judging arrangement met by controller 40, see Col. 4 lns 35-38; claimed position data-obtaining arrangement met by vehicle position determining device 42, see Col. 4 lns 35-38; claimed communication arrangement met by wireless communication device 44, see Col. 4 lns 35-38. In addition, Flick discloses the controller determines the vehicle position information including a vehicle location and an associated stationary period

for each occurrence of the vehicle remaining stationary for greater than a predetermined period, see Col. 2 lns 29-33.

Also, Flick shows in Fig. 4 that the system monitors location when the ignition is on or off.

Regarding Claim 2, Flick again discloses that the controller determines the vehicle position information including a vehicle location and an associated stationary period for each occurrence of the vehicle remaining stationary for greater than a predetermined period. Thus, a time counter function is inherent.

Regarding Claim 3, see above rejection in reference to Claim 2. In addition, Flick discloses the vehicle sensor is a shock sensor, motion sensor, ignition sensor, door sensor, or a combination thereof, see Col. 19 lns 4-7.

Regarding Claim 4, see above rejection in reference to Claim 1.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mansell (US 5223844) discloses vehicle tracking and security system. Gehlot (US 6362736) discloses a method and apparatus for automatic recovery of a stolen object. Dean (US 6609064) discloses a

system and method for grouping GPS data into moving and stationary segments. Workman (US 6801853) discloses a portable motion activated position-reporting device.
